Yes, the river is pretty high but fortunately there was a large clean-out effort last year when it was dry. We did have one flood warning last month but it didn't turn into anything. I'm sure if that work wasn't done last year there would have been some problems.

How is the valley looking with all this water? The river running high?

Hello Taurus,

I received a call from a Mr. Kim Michaels with a company called Eco Blue, who wanted to obtain some drain-down fluid from one of the evaporation ponds in order to further test his company's proprietary process. I have no objection to you giving him some of the fluid if you so desire. Thanks for asking – have a good day!
